DESCRIPTION

The next-generation PocketRocket® 2 stove takes everything impressive about the iconic original and puts it into an even smaller and lighter high-performance design. Barely noticeable in your pack, it's fast at camp, boiling 1 liter of water in 3.5 minutes. Precision flame control goes from torch to simmer, while our WindClip® windshield boosts efficiency in breezy conditions. New folding pot supports create an exceptionally tiny packed size, and they now accommodate a wider range of vessels—pair this stove with the MSR Titan® Kettle for the ultimate fast and light kit.

⚠ WARNING: Contains brass that can expose you to lead, a chemical known to the State of California to cause cancer, and birth defects or other reproductive harm.

[Learn more about Prop 65](#)

- **Ultralight:** Weighs just 73 g (2.6 oz.)
- **Fast:** Boils 1 liter of water in just 3.5 minutes.
- **Compact:** Folding pot supports pack exceptionally small, fitting into an [MSR Titan](#) or Insulated Mug.
- **Strong:** Robust pot supports offer excellent stability.
- **Wind-Resistant:** WindClip™ wind protection and focused burner pushes a persistent, solid flame.
- **Includes:** Ultralight, hard-shell carry case.

S **Sam...**
★★★★☆

Awesome for compact and minimalist backcountry adventures.

I own several MSR stoves. Bought my 1st whisper lite back in 1988 and still use it! My son bought the pocket rocket for scouts so I bought the pr 2. There is a flaw with the set screw where the bottom of the burner assembly mates with the valve. The screws just come loose all the time on their own. This is very frustrating but even worse was MSR's...[Read More](#)

★★★★★

I would highly recommended this stove!

Just completed the Big Bend National Part outer loop and the pocket rocket performed amazingly!! Temperature down in the low 20s not once was I worry about not firing up. Vic

★★★★★

Works great

Works great. This is my first propane stove. It complements an array of liquid-fueled MSR stoves. And a Svea from 1969.

★★★★★

Light and fast

Used this stove in temperatures right around freezing for the first time, it boiled water in a flash! The arms extending out to support a pot are reasonably sized providing some peace of mind while cooking.

I would definitely recommend this stove

Used this stove for first time backcountry camping. It was very efficient and easy to use!

★★★★★

Lightweight and compact

The stove is great for heating water and small batches of food. It's small, lightweight, and well-made. I take it on every three/four day trip.

★★★★★

Same old stove as before.

This is the ""PocketRocket 2"" stove. There is no difference from the original PocketRocket ""1"" stove that I previously had.
