AWESOME POT!

Waxler2 on **Feb 08, 2021**

I went with this pot over the 750ml for several reasons.

- 1) It's easier to cook in, clean, & eat out of due to the wider diameter and shorter height.
- 2) The long handles stay a little cooler and are easier to grab and pour with.
- 3) It holds a 1/4 gallon Ziplock Freezer bag with a reconstituting dehydrated meal perfectly.

The extra 0.8 ounce from the 750ml is completely worth it for the increased function and benefits. Buy this pot! You won't be disappointed.

THE BEST BACKPACKING POT I'VE EVER USED.

CindeRella on **Aug 10, 2018**

I thru-hiked the Appalachian Trail in 2015 using this Toaks Pot. Which essential means I put it through a ton of abuse. I stuck it straight into a fire and cooked on top of embers regularly, and this pot held up beautifully. It doesn't have one dent it, it is lightweight and I am still using it during every adventure years later! I highly recommend them! I even met them during trial days 2016 and they were extremely nice people.
