

HELMET MOUNT KIT

for Exilion, Metro, and Streak Series Only

CONTENTS: (P/N: HLMT-DCV12) Helmet bracket, 12" velcro strap and foam pad
MOUNTING THE HEADLIGHT

1. Add foam pad to underside of helmet bracket to cushion against the helmet. Peel back white paper to reveal adhesive and fasten to the helmet bracket.
2. Weave the 12" long velcro strap up through one slot of the helmet bracket, then through the velcro's plastic loop.
3. Position the helmet bracket above helmet vent holes on the front top of the helmet. Thread the velcro strap downward through the vent hole then up through the opposing vent hole.
4. Insert velcro strap through the helmet bracket slot and pull to tighten. Then fasten the velcro strap to itself, making sure the helmet bracket is secured in place.
5. Sliding backward, insert the headlight into the helmet bracket until it locks in place. To remove the headlight, press the bracket tab down and slide the headlight forward.
