

Easily switch out air chucks to work with your presta or schrader valve system on your bike. Schrader chuck can also be used on vehicles, motorcycles, and more.

To charge glow-in-dark dial, simply expose dial face directly to a light source (sun, LED, flashlight, smartphone light, etc) for 10-20 seconds.

Built-in valve serves two functions:
(1) Hold to release air pressure from tires
(2) Press to clear pressure reading to zero

0-160 PSI range is ideal for high pressure tires common on road bikes, hybrids, motorcycles, trucks, trailers, etc.
