Features

- Asymmetric Power Transmission construction delivers more lateral power and increased edge grip, thanks to the interior shell being thicker than the exterior
- 45 mm power strap and 4 buckles provide precise power transmission and control
- Softer material at the instep makes stepping in and out of the boots easier, regardless of temperature
- T.Ride walk mechanism is fully integrated into the boot design for a solid, low-profile cuff and shell connection that boosts strength and performance while being easy to use
- Intuitive design ensures you always know whether T.Ride is in ski or hike mode, while an integrated lock system screw keeps the mechanism closed during rough rides
- Optional lock mode removes any potential play in the boots and delivers complete confidence for remaining in ski mode on the downhill
- Free Move hinge point design allows for frictionless hiking, so you can hike farther using less energy
- 50° range of motion allows for a comfortable hike up to the summit—or an easier walk in the parking lot
- Updated C.A.S. liners are lighter yet more supportive and durable, offering optimal comfort and heel hold; new accordion structure on the backs allows for easy hiking
- 99 mm anatomic lasts match the shape of your feet for an ideal out-of-the-box fit; for a custom fit, your bootfitter can punch, grind and mold the C.A.S liners and shells

Imported.
